

Lighthouse Montessori School Newsletter

Theme for Month

Season: Summer

All School: Celebrate America

Sun: Down on the Farm & Under the Sea

Earth: Transportation & Down on the Farm

Ocean: Under the Sea & Transportation

Tuesday, July 14th, will be Water Play Day. Children will enjoy getting wet in water sprinklers, water tables

and a small wading pool. Children should come to school with swim clothes on. They can wear their swim clothes under their regular clothes. Be sure your child has a change of clothes and a towel in a bag with their name on it.

Parent volunteers will be needed.

Please sign up outside your child's class.

The children are enjoying our Summer Adventure Fun themes. For Show and Tell each Wednesday tell can bring an item from home relating to the theme. You can rehearse with your child what they can tell their class about the item. What is it? What it does! Why?

Summer Heat & Indoor Play

To keep children safe, we'll stay indoors when temperatures rise above **85°F**. On hot days, we may also shift outdoor play to cooler parts of the day.

Our Sun and Earth Room children will enjoy a Curious George Learning Series featuring a storybook, a short educational video, and a

related hands-on activity. On very hot days, when outdoor play is limited, we may use these brief videos as part of our curriculum. We may also occasionally show short educational videos related to special celebrations. These activities are designed to support classroom learning, and our Ocean Room children will not participate due to their younger age.

Pickup Authorization: We renew our Pickup Authorization Form every six months, and it's time for the next renewal. Please note that the Pickup Authorization Form is different from your Emergency Contact List. The Emergency Contact List is used only during emergencies, while the Pickup Authorization Form is used for your child's regular daily pick-up.

AI Parenting Video Series!

Ms. Teresa has launched a Parenting Tips section on our website

featuring short AI-assisted videos that share practical strategies based on Montessori education and child development. These videos reflect many of the approaches we use every day at Lighthouse, and we hope you'll take a few minutes to check them out!
